Particular attention will be paid to the potential changes in the workforce and how the new expectations of new and existing people in this workforce will require a greater and innovated focus on workforce experience. This includes radical changes in the types and numbers of jobs offered as well as other ways of contributing to a business.

We will also focus on the way HR will need to manage the disruption digital business will bring and which will require a more people-centric, collaborative approach to change if organisations are going to navigate the revolution successfully.
